

**Practical 7B:**

**Write a Javascript to prompt for users name and display it on the screen.**

```
<!DOCTYPE html>

<head>

  <title>Prompt User Name</title>

</head>

<body>

  <h2>Welcome</h2>

  <button id="showNameBtn">Enter Your Name</button>

  <p id="displayName"></p>

  <script>

    document.getElementById('showNameBtn').onclick = function ()

    {

      const userName = prompt("Please enter your name:");

      if (userName) {

        document.getElementById('displayName').textContent = Hello, ${userName};

      } else {

        document.getElementById('displayName').textContent = "You did not enter a

name.";

      }

    };

  </script>

</body>

</html>
```

**OUTPUT:**

**Welcome**

Enter Your Name

Hello, karan
